

We painted the interior walls and ceiling of this house with Cerama-Tech in 1996. App. 2,200 sq ft red brick house in Denison, Texas. One AC unit that was also installed in 1996.

The owner gave us permission to post this latest electric bill. He also laughed and said " All of my neighbors in this area 'talk and squawk' about

having to pay WAY MORE for THEIR energy bills. I love Cerama-Tech!" (\$107.66)

Average Billing is a great way to help you manage your household budget. You'll avoid big bill surprises by paying an averaged amount each month, smoothing out seasonal highs and lows. See last page for details.

Thank you for choosing us as your electricity provider. We can help you choose a plan that's right for you - just call 1-866-RELIANT. For more information about residential electric service please visit www.powertochoose.com

This is what his bills look like with their thermostat set at 74 degrees and they are there every day of the month. Soon, we will be coating the AC duct and water heater in his attic and make that bill even cheaper.

What was not stated on the site was that shortly after the Cerama-Tech was painted on the interior of his home, his old electricity provider came out and changed out his meter. Some months later, they came out and

changed out the meter *AGAIN*. *Some months after that, they did that AGAIN. Three times total.*

He got fed up soon after and switched to Reliant, his current electricity provider.
